Complete Safety Solutions from Banner

EZ-SCREEN LS Safety Light Curtains

- Intuitive and easy-to-use and set up
- End-to-end sensing
- Heavy-duty aluminum housing and recessed window to avoid damage in harsh environments
- Highly visible alignment and diagnostic indicators
- IP69 Hygienic models available for washdown environments
- Cascade capable models available
- See page 12

XS26-2 Expandable Safety Controllers

- Up to eight expansion I/O modules can be added as your safety application grows or changes
- Configuration software is so simple that you will be programming in minutes
- Simulator functionality allows users to test their configurations without being connected to a controller
- See page 38

Lighting and Indication

- Preassembled and preconfigured multi-segment LED tower light indicators
- Programmable multicolor LED indicators, panel mount models available
- Pro Editor software offers a wide variety of color and animation options

SGS Safety Grid Systems

- Multiple beam safety light devices for access and long-range perimeter guarding
- Available in emitter/receiver models and in easy-to-deploy active/passive models
- Heavy-duty aluminum housing for tough environments
- Easy alignment and installation with on-board alignment lamp and indicators
- Muting arm kits available to simplify end-of-line packaging applications
- See page 24

Emergency Stop and Stop Control

- E-Stops available as panel mount, or as preassembled enclosures
- E-Stop models with illumination help operators to quickly identify actuated buttons
- Enabling devices provide ergonomic design with a detented enable position
- See page 56

Safety Switches

- Non-contact RFID switches accommodate misaligned/vibrating doors in a compact package
- Hinge switch combines safety switch and load bearing hinge in a single package
- Locking switches ensures doors remained closed for safety and process critical applications
- See page 48

SX5 Safety Laser Scanners

- Two-dimensional laser scanner with easy-to-use software
- Programming of irregular shaped warning and detection zones
- 275° scanning angle with selectable resolutions and 5.5 m range
- See page 34

Network Technology down to the Sensor Level

In-Series Diagnostics (ISD)

Industrial Ethernet

HMI / PLC

Banner In-Series Diagnostics

- Up to 32 ISD devices connected with one in-series cable communicate directly with PLC/HMI
- ISD provides an array of data including device status, voltage, temperature, RFID tag value, sensing distance and more

1234567890
74.5°C
13.7V
Status: ON
Alignment: OK
08.0mm

Safety System Diagnostics

- Reduce downtime by quickly diagnosing safety events and displaying them on the HMI
- Prevent Downtime with ISD preventative maintenance alerts

Virtual Reset

- Eliminate physical button & wires
- Reset from touch screen HMI over Industrial Ethernet

Intuitive setup and PLC integration

- Free, Easy to use PC software
- Export tag feature for easy tag creation in a PLC (Patent Pending)

ISD Banner In-Series Diagnostics (ISD)

Easy-to-Implement Diagnostic Capabilities for Complex Safety Systems

In-Series Diagnostics allows connection of up to thirty-two devices with one in-series connection and communicate directly with the most commonly used PLCs.

When a Safety Event occurs the system receives an alert that includes information about which safety device tripped, making troubleshooting a breeze.

In-Series Diagnostics provides an array of additional data points for each In-Series Device used, including a unique tag value, internal temperature, voltage, and more, along with device-specific details such as the alignment and distance between a safety switch's sensor and actuator.

Additionally, the system sends warning alarms if devices are near to tripping, so that issues can be addressed before your machine shuts down.

XS26-ISDd Expandable Safety Controller

- Safety Controller + ISD to PLC Gateway
- Easy to configure with free PC software
- Up to 256 ISD Devices
- Expandable up to:
 - 394 total safety devices
 - 68 safety outputs
- Profnet, Ethernet/IP, Modbus TCP

XS26-ISDd

SC10 Safety Controller with Built-in Safety Relays

- Safety Controller + ISD to PLC Gateway
- Easy to configure with free PC software
- Up to 64 ISD Devices
- Supports up to 70 total safety devices
- Two independently controlled 6A safety relay outputs
- Profnet, Ethernet/IP, Modbus TCP

SC10-2roe

ISD to IO-Link Modules

- Compact field device
- ISD to IO-Link Gateway
- Connect up to 32 ISD inputs
- Easily daisy-chain to a safety system
- IP20 and IP69 models available

SI-RFA-DM1 (IP20)
SI-RFA-DM2 (IP69)

Type 4 Heavy-Duty Light Curtains

Robust safety light curtains for harsh industrial environments

Banner Engineering's easy-to-use, heavy-duty Type 4 safety light curtains with several resolution options available to detect fingers, hands, arms, or legs. Our heavy duty light curtains are built to withstand harsh industrial environments.

Due to its robust design, the EZ-SCREEN LS is the perfect fit in large robotic cell applications that require sturdy safety devices and heavy duty enclosures.

EZ-SCREEN LS light curtains in hygienic tubular enclosures successfully protect operators from injury and remain hygienic for easy cleaning procedures.

Type 4 Compact Light Curtains

Compact safety light curtains for safety in tight spaces

Banner Engineering's easy-to-use, compact Type 4 safety light curtains are available with several resolution options available to detect fingers, hands, arms, or legs. Our compact safety light curtains are ideal for smaller machines and other space-constrained areas.

SLC4 are Type 4 safety light curtains specifically designed to safeguard smaller points of operation and access on compact machines.

The EZ-SCREEN LP safety light screen is compact and mounts in tight spaces with its continual end-to-end sensing that leaves no gaps.

Safety Light Curtain Selection

Choose your safety light curtain, suitable for a wide variety of safety applications.

- Heavy-Duty Type 4 robust safety light curtains for harsh industrial environments
- Compact Type 4 safety light curtains for safety in tight spaces
- Type 2 cost-effective safety light curtains for lower risk applications

Type 4 Safety Light Grids

Easy-to-use, heavy-duty Type 4 grids for perimeter guarding

Two to four beam Type 4 safety light grids protect personnel from injury and machines from damage by guarding access, areas, and perimeters. Able to detect a body in a cost-effective and heavy-duty safety light curtain package.

SGS Safety Grid Systems, with two, three, or four beams, are used to monitor the perimeter of the work area.

SGS Safety Grid Systems are available in Emitter/Receiver models capable of safeguarding over very long distances and in easy-to-deploy Active/Passive models.

Muting Options for Safety Light Grids

Certain SGS models are available with integral muting for specific types of entry/exit applications

Integral Muting allows monitoring of redundant mute device inputs and automatically suspends (mutes) the safeguarding function of a device during the non-hazardous portion of the machine cycle.

Integral muting models have muting technology built into the device eliminating the need for an external muting controller. Preassembled muting arm kits are available in T, L and X configurations. The muting kits use premounted hardware and Q20 retroreflective sensors and reflectors.

Benefits of Muting

- Maintain high safety standards while allowing for a predetermined object to break a beam
- Limit downtime by not unnecessarily shutting down a conveyor or robot cell

Applications

- Assembly and packaging machines
- Automated production equipment
- Robotic work cells
- Automated warehouses
- Palletizers

Mute Arm Kits

Preassembled (with mounting hardware) for plug-and-play connection to the SGS grid and LS Safety Light Curtains

- Wiring connection block or cable accessories available
- Adjusts easily for line changes
- Hardware kit to attach mute arms to LS curtains, EZLSA-MCB-HW, ordered separately from mute arm kits

L-Configuration

SGSA-ML-L-LPQ20

- Includes 2 mute arms, 2 SGSA-Q20PLPQ5 mute sensors, and 2 retroreflectors

SGSA-ML-R-LPQ20

- Includes 2 mute arms, 2 SGSA-Q20PLPQ5 mute sensors, and 2 retroreflectors

T-Configuration

SGSA-MT-LPQ20

- Includes 4 mute arms, 4 SGSA-Q20PLPQ5 mute sensors, and 4 retroreflectors

X-Configuration

SGSA-MX-LPQ20

- Includes 4 mute arms, 2 SGSA-Q20PLPQ5 mute sensors, and 2 retroreflectors

SGS Selection

Choose your safety light grids for perimeter guarding.

- 2, 3 & 4 beam Emitter/Receiver models with a broad feature set
- 2, 3 & 4 beam easy-to-deploy Active/Passive models, only require wiring to the active side

Safety Light Grids – Model Keys

SGS Emitter/Receiver

- When compared to higher resolution light screens, a lower cost option for body detection applications
- Available with integral muting
- Long range, up to 60 m

Type	Protective Height (mm)	Range (m)	Integral Muting	Model
Emitter & Receiver	500 (2 beams)	6 to 60	No	SGSXP2-500Q88
	800 (3 beams)			SGSXP3-400Q88
	900 (4 beams)			SGSXP4-300Q88
	1200 (4 beams)			SGSXP4-400Q88
Emitter & Receiver	500 (2 beams)	0.5 to 30	No	SGSSP2-500Q88
	800 (3 beams)			SGSSP3-400Q88
	900 (4 beams)			SGSSP4-300Q88
	1200 (4 beams)			SGSSP4-400Q88
Emitter & Receiver	500 (2 beams)	0.5 to 30	Yes	SGSMP2-500Q128
	800 (3 beams)			SGSMP3-400Q128
	900 (4 beams)			SGSMP4-300Q128
	1200 (4 beams)			SGSMP4-400Q128

SGS Active/Passive

- Active transceiver contains emitter and receiver
- Reduces overall wiring costs
- Available with integral muting
- Up to 8 m range

Type	Protective Height (mm)	Range (m)	Integral Muting	Model
Active Transceiver	500 (2 beams)	0.5 to 8	No	SGSSA2-500Q8
	800 (3 beams)			SGSSA3-400Q8
	900 (4 beams)			SGSSA4-300Q8

MSA-S105-1	2667 mm (105")	2667 mm (100")

Safety Scanner System

Horizontal or vertical monitoring of both personnel and stationary or mobile systems

SX Series safety laser scanners protect personnel, equipment, and mobile systems by continuously scanning a user-defined area of up to 275° to create a two-dimensional protected zone.

SX5 software configuration allows zone switching for full, right-side and left-side safety protection during this forklift access application.

Software interface makes it easy to create custom safety and warning zones to safeguard large, complex, and irregularly shaped areas.

Safety Scanner System

Increased Machine Uptime

The SX5 has on-board LED indicators and a large multi-segment color display that provide at-a-glance system status information so users can quickly identify zone breaches and resolve issues with a minimal amount of equipment downtime.

Compact, one-piece safety device installs easily above and away from area hazards without requiring time-consuming alterations to area infrastructure.

An alert is triggered if an object enters the warning zone and equipment will come to a stop if the safety zone is breached.

Light Immune and dust resistant – Best-in-class

Up to 70 configurable safety zone sets

Rugged design for reliable industrial use

Numerous status, diagnostic, warning and error displays

Dynamic Muting available and selectable detection capability for vertical applications

- LED 1: Object Detection in Safety Zone (OSSD)
- LED 2: Not Available
- LED 3: Assigned to Warning Zone 2
- LED 4: Assigned to Warning Zone 1
- LED 5: Interlock Status (waiting for Reset)

Keypad

M12 Ethernet connector cover for standalone models

Safety Scanner System

Removable memory for fast scanner replacement

The system configuration is backed up in a removable memory unit. Install your replacement scanner fast and easy, without needing to reconfigure your system. The machine interface cables attach to this memory unit on the Master models.

Master and Remote connection reduces wiring

For applications that require monitoring multiple sides of an AGV, up to four scanners can be easily connected through an Ethernet-based safe communications bus, working as a single system.

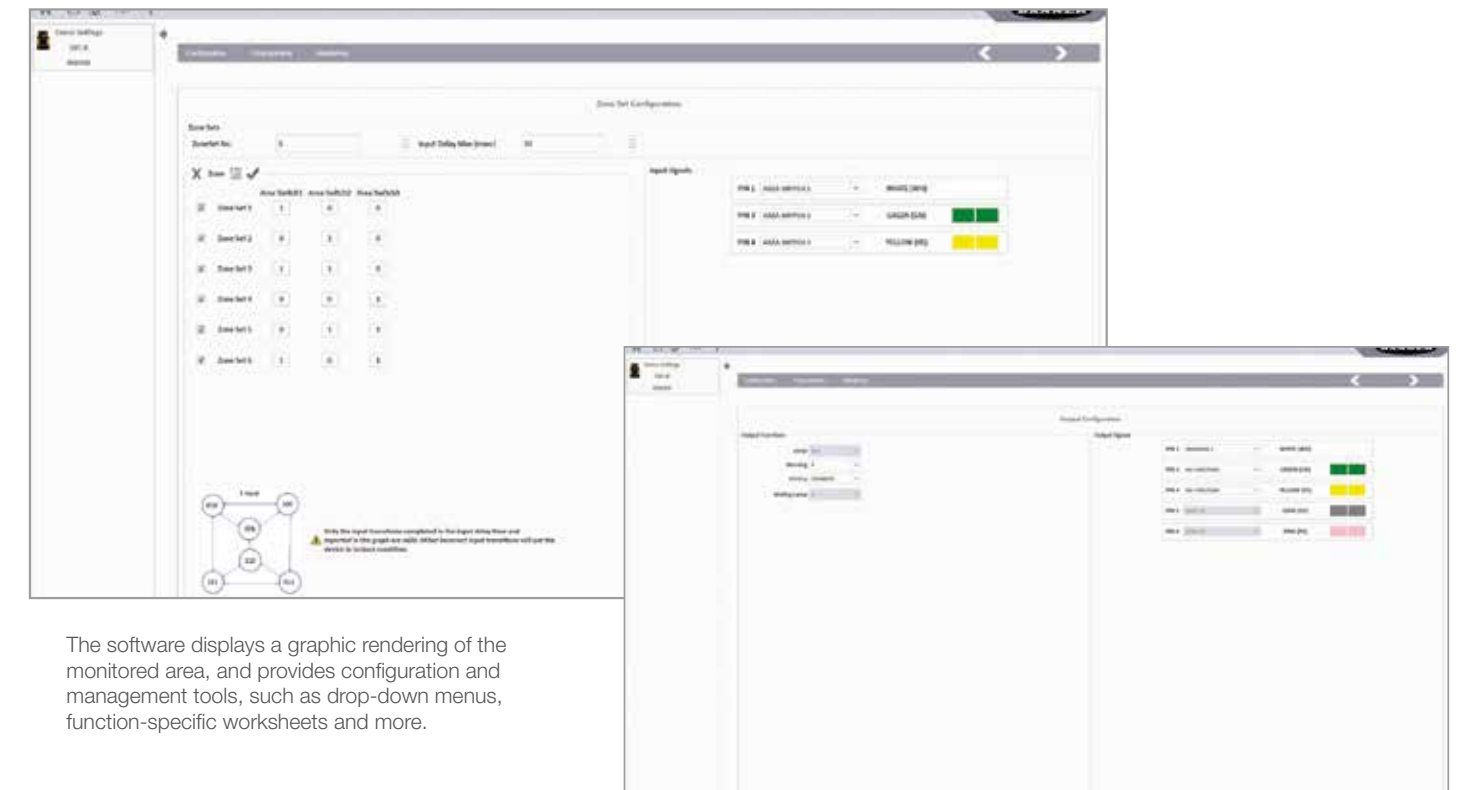

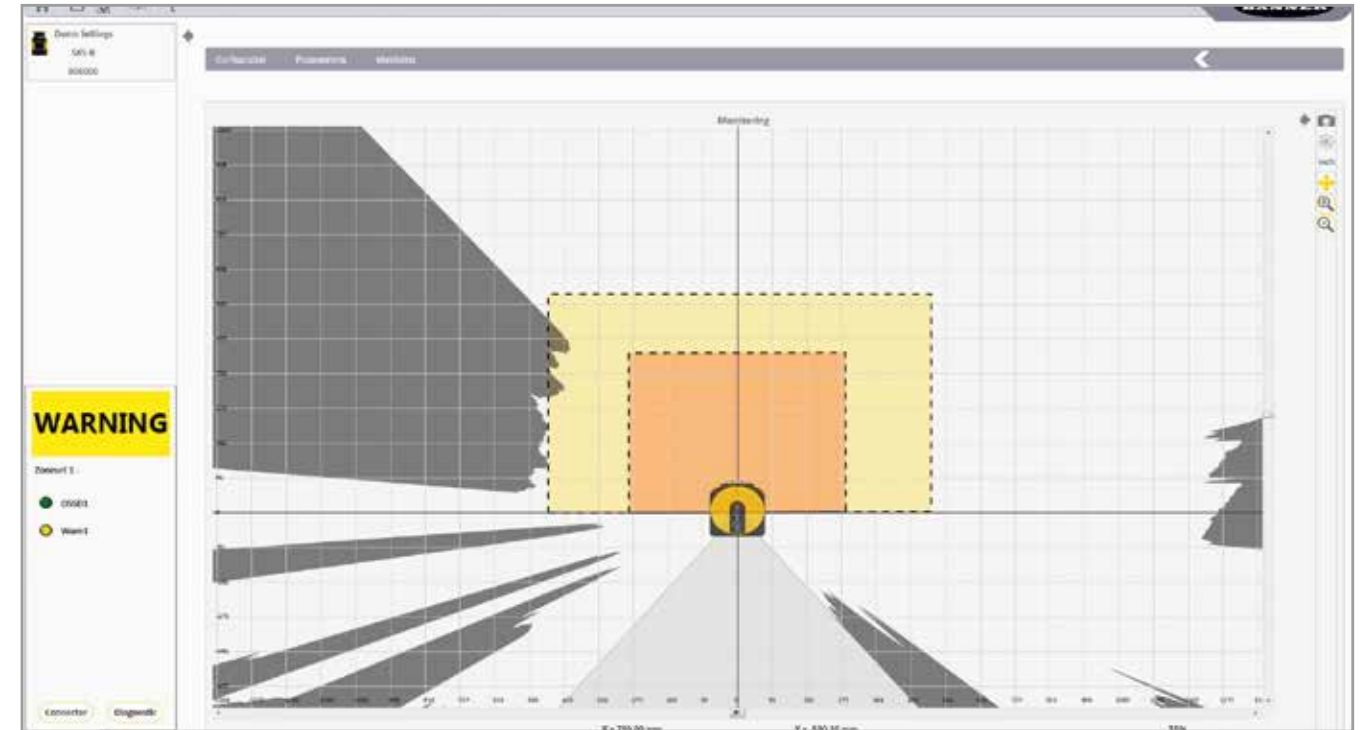

Each remote unit is connected to the master by a single cable that provides them with power, and the memory of the entire system is stored in the master.

Safety Scanner System – Software

Simple Setup for Rapid Deployment

The SX5 can be set up in just a few simple steps using Banner's free configuration software. This robust software features menu-driven tools that guide users through setup and make it easy to design custom safety and warning zones to accommodate existing infrastructure and meet the specific needs of any application.

The software displays a graphic rendering of the monitored area, and provides configuration and management tools, such as drop-down menus, function-specific worksheets and more.

Safety Scanner – Fixed Applications

Fixed applications / stationary area guarding

Stationary area guarding uses sensing fields such as safety or warning zones to continually sense an individual within a safeguarded area. Stationary area guarding can reduce or eliminate the possibility of a pass-through hazard that could result in an individual being exposed to unexpected machine startup or motion.

Single-zone safeguarding

The safety scanner detects when a person approaches a hazard. When the person enters a warning zone, the hazardous motion is controlled safely. When the person enters the safety zone, the hazard is stopped.

Multi-zone safeguarding

Up to three safety zones can be monitored simultaneously and independently. This way, safety in the entire plant is optimized, ensuring increased productivity and improved ergonomics in the entire plant.

Multi-zone safeguarding via master-remote

Manage multiple areas with master-remote architecture. Multiple safety zones stop different parts of the dangerous machine, without the need of an external controller.

Safeguarding with dynamic and partial muting

Muting sensors can be directly connected to the SX5, creating a tightly protected area around the muted object while muting is active. Each safety output can be configured with its own muting requirements.

Safety Scanner – Mobile Applications

Mobile applications / mobile area guarding

On mobile applications, the SX5 monitors the area directly ahead of the vehicle using both the warning and the safety zones. The vehicle slows down if something is detected in the warning zone and the vehicle stops when something is detected in the safety zone. If the speed increases or decreases, alternate zone sets can be used to adjust for varying stopping distances.

Automated Guided Vehicle collision avoidance

Warning and safety zones can be used to alert operators, slow down the vehicle or stop it. Up to 70 different zones can be set and activated per position, speed and movement of the vehicle.

Safe speed monitoring

Incremental encoders inputs can be directly read by the SX5 scanner in order to select the appropriate slow-down and stopping areas, based on the speed of the vehicle.

Advanced measurement data for direct navigation

The SX5 has a direct transmission protocol over Ethernet. It can be used to read measurement data for vehicle navigation. Data includes active zone, I/O status, measured speed, intensity of beams and diagnostic.

Collaborative robot monitoring

Mobile collaborative robots (cobots) have built-in safety features that enable them to work alongside humans. Cobots can be programmed to slow down or stop when a human enters the warning or safety zone.

Safety Relays and Safety Controllers

Industrial safety controllers and relays provide an interface between safety devices and the machines and processes those devices monitor for a complete and easy-to-use safety control solution.

Safety Relays

- Cost-effective for simple safety circuits
- Preset Functionality: Configuration not required
 - Safety Inputs: 1
 - Independently controlled Safety Outputs: 1; 4 to 7A
 - Choose from a variety of models:
 - Universal input safety relays
 - E-Stop monitoring safety relays
 - Muting safety relays
 - Safe speed monitoring relays
 - Safety mat relays
 - Safety extension relays
 - Interface relays

Safety controllers can be tailored for a wide variety of machines, including machines with multiple processes.

Hybrid Safety Controller plus 2 Safety Relays

- Flexible and cost-effective solution for machines typically using 2 Safety Relays
- PC Configurable: Flexible and easy-to-use
 - Safety Inputs: up to 10; up to 70 with ISD
 - Independently controlled Safety Outputs: 2; 6A each
 - Convertible Safety Inputs: 4
 - Terminal LEDs for easy troubleshooting
 - Industrial Ethernet
 - Each output contains 3 NO redundant safety contacts

Safety Relays and Safety Controllers

Configurable controllers monitor multiple safety devices, such as E-stop buttons, safety switches, safety light screens, two-hand controls and rope pull switches.

Expandable Safety Controller

- Expandable for Complex Safety applications where 3 or more safety relays are typically used
- PC Configurable: Flexible and easy-to-use
 - Safety Inputs: 26 (base unit) up to 154
 - Independently controlled Safety Outputs: up to 68; 0.5A to 6A each
 - Convertible Safety Inputs: 8 (Base Unit) up to 40
 - LCD Display for easy troubleshooting
 - Industrial Ethernet

Connect safety devices easily to the safety controller

Relay and Controller Selection

Safety Controllers

XS26 Expandable Safety Controller

SC10 Safety Controller

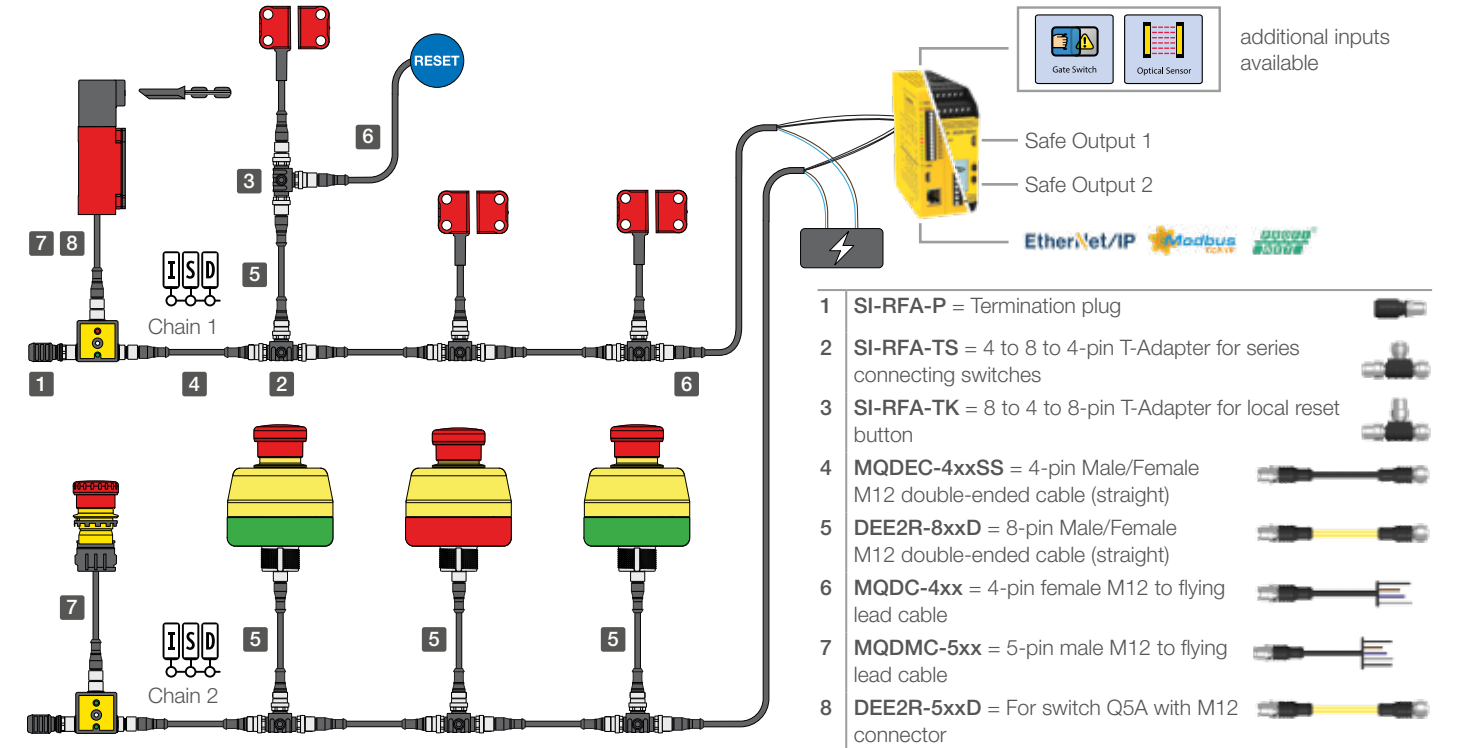

Easy to Configure and Integrate with a PLC

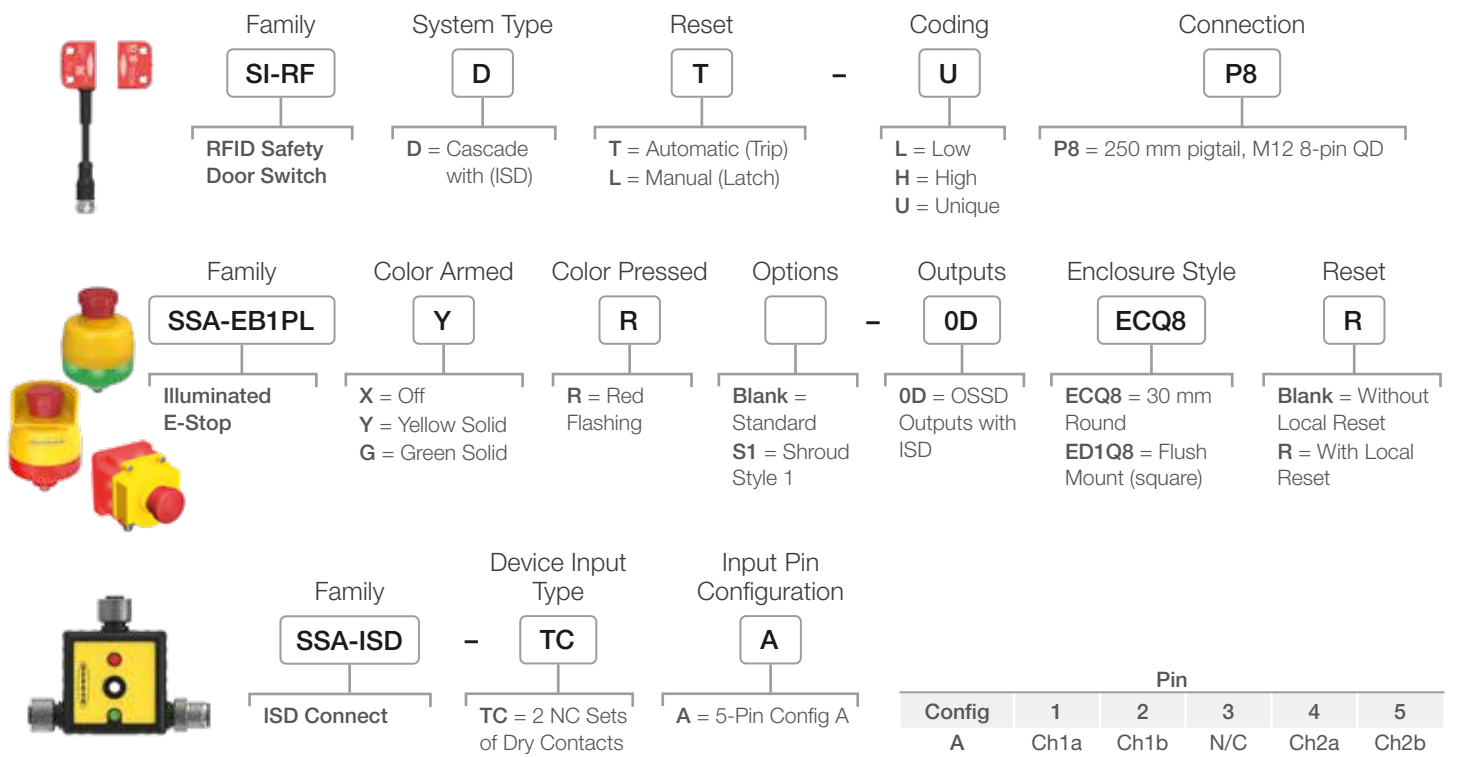

In-Series Diagnostics Functionality

In-Series Diagnostics allows you to connect up to 32 devices with one in-series connection and communicate directly with the most commonly used PLCs. Achieves up to CAT4, SIL3, PLe safety rating.

Compatible Devices

Configure your system in minutes

The feature-rich SC10 and SC/XS26 safety controller software provides a seamless user interface for setting up and managing safety systems. The software features an intuitive icon-based, drag-and-drop user interface to reduce the learning curve and speed up commissioning.

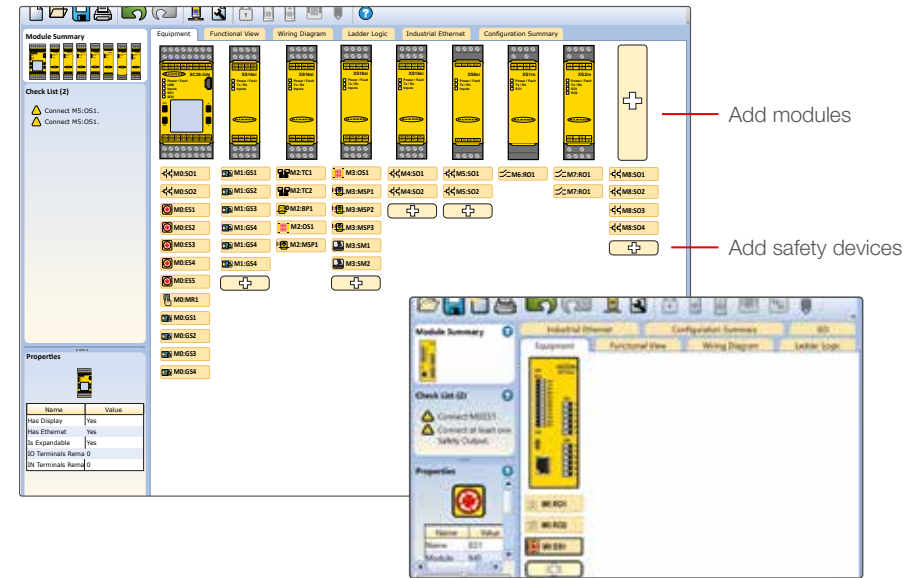

- Complex configurations made easy
- Simulate configurations before implementation
- Auto configure Industrial Ethernet for remote monitoring and diagnostics

Start using the **free software** today. Go to www.bannerengineering.com/safetycontroller

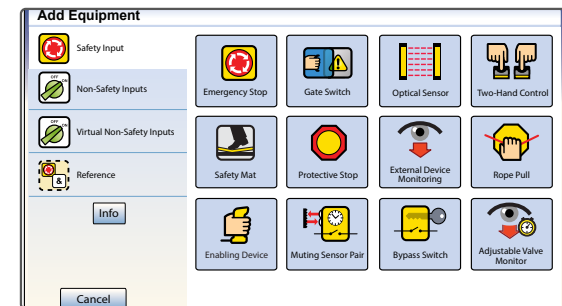

1. Choose Controller

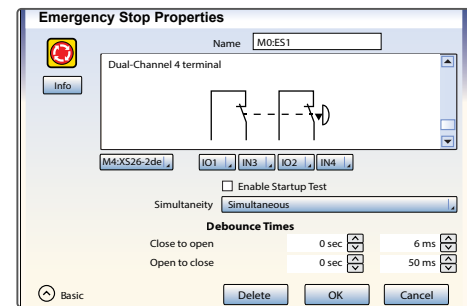

2. Equipment View

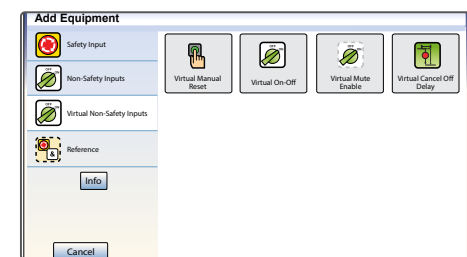

3. Add safety devices

4. Select safety device properties

5. Add virtual non-safety inputs

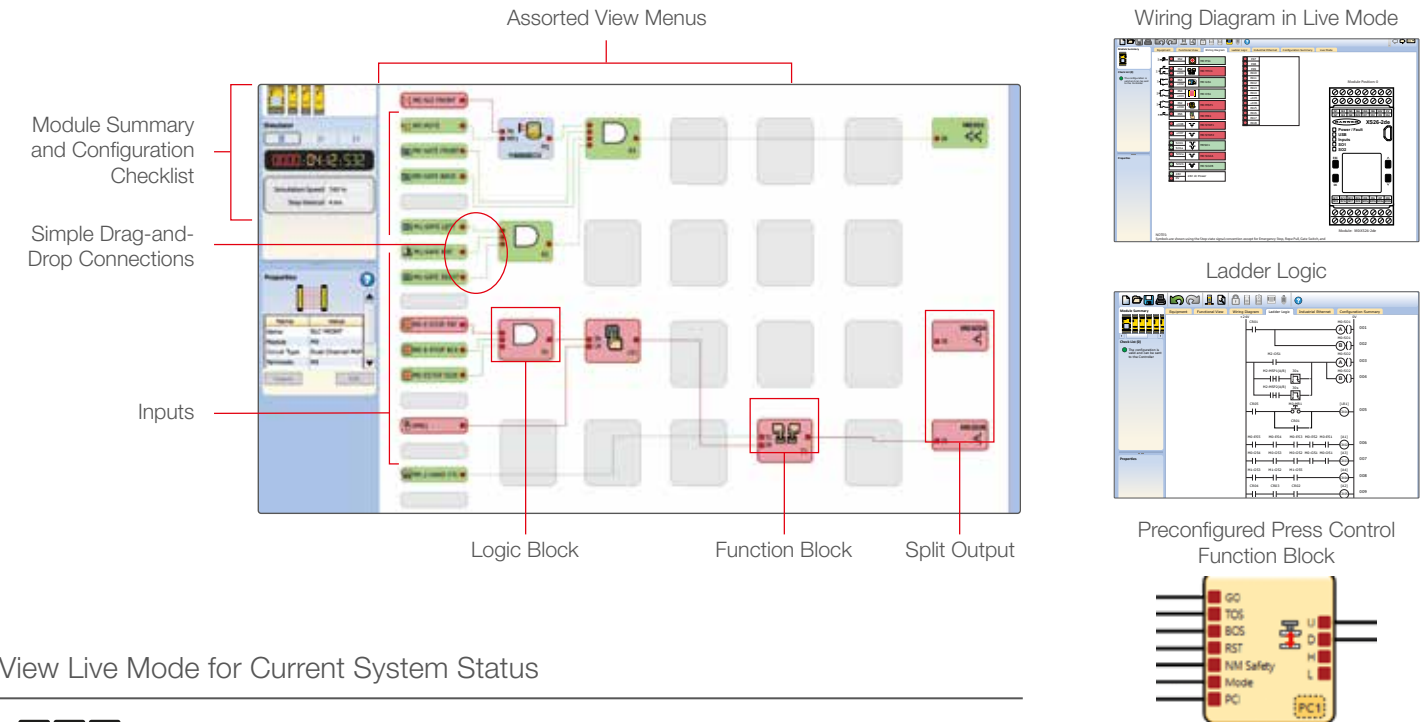

Intuitive setup and PLC integration

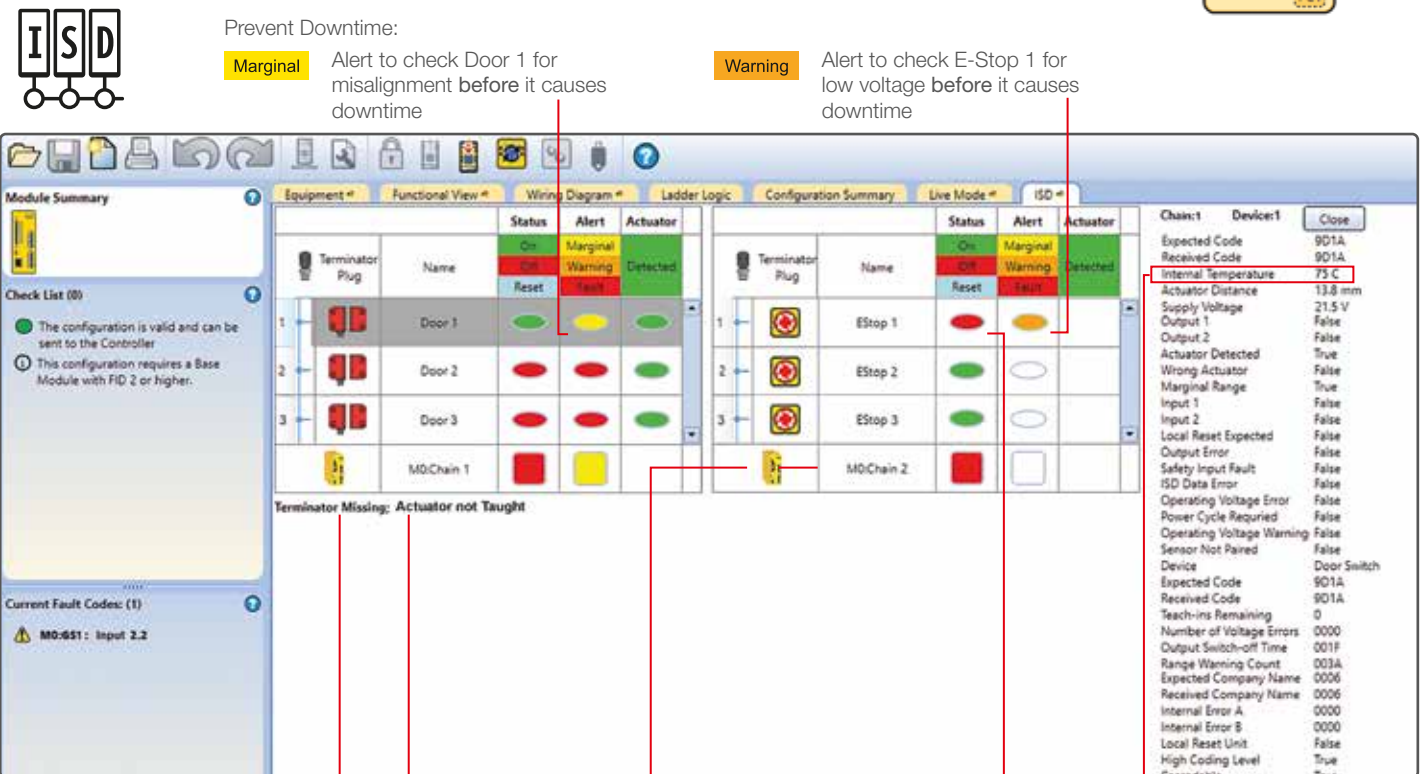

- Expedite PLC Integration with Tag Export Feature
- Eliminates error-prone manual entries
- Import tags to PLC via .csv or .xml files
- Defines actionable In-Series Diagnostic data within the PLC
- For more information visit bannerengineering.com/safetycontroller

System Software

View Live Mode for Current System Status

Troubleshooting Made Easy:
Terminator missing

Actuator not taught

Up to 32 ISD safety devices in any order per chain

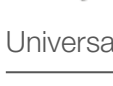

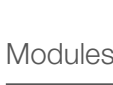

Reduce Downtime:
Local operator guidance to activated E-Stop

Additional uses for ISD

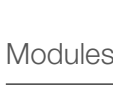

- Rotation/Indexing
- Tool Identification
- Position Verification

Safety Relays – Models

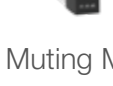

E-Stop and Guard Safety Modules

Model	Supply Voltage	Inputs	Safety Outputs	Aux. Outputs	Output Rating	Output Response Time

Expandable Safety Controllers

Model (24V dc)	Description	Housing (H x W x D in mm)	Inputs/Convertible	Independently Controlled Safe Outputs	Maximum Safety Output Rating
 XS26-2d  XS26-2de	Base Controller, expandable, with LCD	110 x 45 x 128	26/8	2 Dual Channel PNP	0.5A @ 24V dc
 XS26-2  XS26-2e	Base Controller, expandable	110 x 45 x 128	26/8	2 Dual Channel PNP	0.5A @ 24V dc
 XS26-ISDd  ISD	Base Controller, expandable, with LCD	110 x 45 x 128	26/8	2 Dual Channel PNP	0.5A @ 24V dc
 XS8si	Safety Input Module	W: 22.5 mm	8/2	/	/
 XS16si	Safety Input Module	W: 22.5 mm	16/4	/	/
 XS2so	Safety Output Module	W: 22.5 mm	/	2 Dual Channel PNP	0.75A @ 24V dc
 XS4so	Safety Output Module	W: 22.5 mm	/	4 Dual Channel PNP	0.5A @ 24V dc
 XS1ro	Safety Relay Output Module	W: 22.5 mm	/	1 Dual Channel Relay	6A; 2 NO, 1 NC Aux (2.5A)
 XS2ro	Safety Relay Output Module	W: 22.5 mm	/	2 Dual Channel Relays	6A; 2x 2 NO, 2x 1 NC Aux (2.5A)

Expansion Modules

Model	Supply Voltage	Inputs	Safety Outputs	Output Rating	Aux. Outputs	Output Response Time	Delay
 EM-T-7A	24 V dc	1 NC (single) or 2 NC (dual)	4 NO	6 A	–	20 ms	–
 EM-F-7G	24 V ac/dc	1 NC (single)	4 NO	6 A	–	35 ms	–
 EM-FD-7G2	24 V ac/dc	1 NC (single)	4 NO w/delay	6 A	–	–	0.5 s
 EM-FD-7G3	24 V ac/dc	1 NC (single)	4 NO w/delay	6 A	–	–	1.0 s
 EM-FD-7G4	24 V ac/dc	1 NC (single)	4 NO w/delay	6 A	–	–	2.0 s

Accessories

Safety Switches

Hinge Switches

Non-Contact Switches

RFID SI-RF Switches

Safety switches respond when a mechanical guard is opened. They feature “positive opening” contacts for high reliability regardless of environmental conditions and withstand attempts to override the switch and defeat the system.

- One-piece sensor and actuator with hinge function
- Fast installation and set-up with repositionable safety switch point
- Stainless steel and IP69 available
- Matching hinges without sensing available for additional door support
- Available with up to 270° safety switch point operation range

- Two-piece design where sensor and actuator do not contact
- Coded magnets/tags minimize the potential for intentional defeat
- A single pair can achieve up to Category 4/PLe safety rating
- Accommodating to misalignment
- Non contact solution minimizes device wear and tear, even in applications with persistent use
- Up to IP69 solutions available

Single door RFID non-contact gate/door sensing solution

- Basic, medium and high tamper resistance
- Misalignment tolerance of 10 mm
- Resistant to high vibration and operations with metallic shavings
- On-board LED for status and diagnostics

Mechanical Switches

Locking Switches

Limit Switches

- Two-piece design with mechanical operator feedback
- Flexible actuator options for misalignment
- Rotatable heads for flexible installation
- Mechanically coded actuator to minimize tampering
- Up to 15N latching force to reduce downtime due to vibrating doors
- One-piece limit switches available

- Two-piece design with up to 2000N locking force for safety or process critical applications
- Flexible actuator options for misalignment
- Rotatable heads for flexible installation
- Mechanically coded actuator to minimize tampering
- Up to 15N latching force to position door prior to locking

- Cost effective one piece sensor
- No actuator allows for fewer alignment issues
- Hideable making them more tamper-resistant
- Rotating head and top or side engagement allows for eight different actuator positions
- Design meets positive opening requirements for safety switches

RFID SI-RF Switches – Cascade

Multiple door RFID non-contact gate/door sensing solution

- Basic, medium and high tamper resistance
- Misalignment tolerance of 10 mm
- Resistant to high vibration and operations with metallic shavings
- On-board LED for status and diagnostics
- Connect up to 32 sensors in cascade while maintaining the highest level of safety
- 4-pin QD connections for cost-effective, simple, error-free installation
- RFID Cascade with In-Series Diagnostics available

Safety Switches Selection

Choose a safety switch.

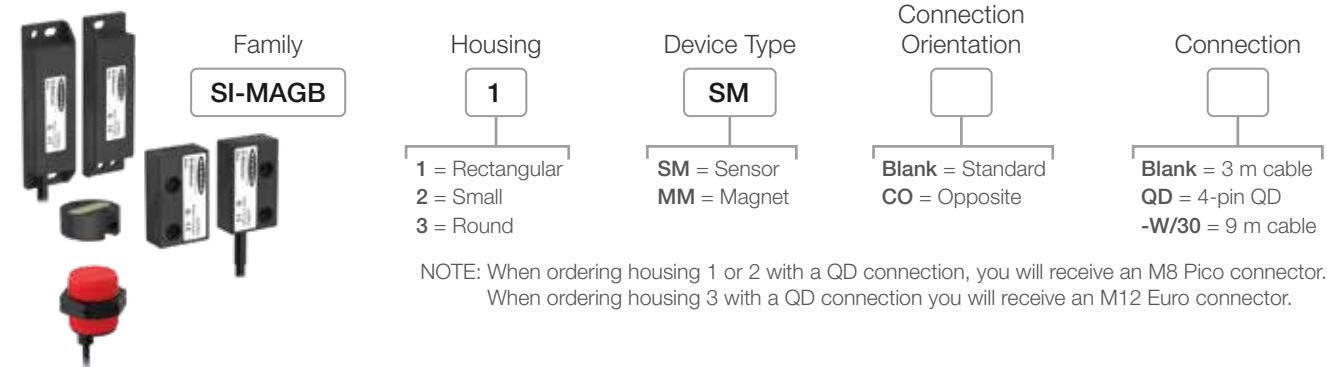

- RFID Safety Switches
- Magnetic safety switches
- Plastic or metal compact safety switches
- Hinge safety switches
- Guard locking safety switches
- Rotary Lever, Plunger, Roller and Spindle-Mount Safety Limit Switches

Mechanical Switches

Safety Switches

The SI-GL42D fail-safe guard locking switch has several guard locking options: manual, spring-to-lock or power-to-lock.

The safety switch can manually be unlocked using a tool, in case of maintenance work. Emergency or escape release are additional functions that allow for quick intervention when required.

In spring-to-lock models, the guard is locked by spring force. To unlock, the solenoid must be energized.

In power-to-lock models, the guard is locked when the solenoid is energized. To unlock, power must be switched off.

Rotatable actuator heads enable a variety of mounting positions: standard, vertical, horizontal, slight vertical/horizontal offset, small actuating radius

Lock/unlock mechanism

Emergency release enables immediate opening from outside dangerous area

M12 connector options are available

Escape release enables immediate opening from within the dangerous area

Escape release extensions

Limit Switches

Family: **SI-LM**

Body Style: **40**

Actuator Type: **PB**

Contact Configuration: **D**

PB = Plunger
RC18 = Roller
LA18 = Spindle-mount lever (18 mm roller)
L20 = Lever (20 mm roller)

D = 1 NO/1 NC
E = 2 NC
F = 2 NC/1 NO

Family: **SI-LS**

Body Style: **83**

Actuator Type: **PB**

Contact Configuration: **D**

PB = Plunger
RC10 = Roller
LA18 = Spindle-mount lever (18 mm roller)
LE13 = Lever (13 mm roller)

D = 1 NO/1 NC
E = 2 NC

Hinge Switches

Family: **SI-LS**

Body Style: **31**

Actuator Type: **HG**

Contact Configuration: **D**

HG = Vertical hinged lever ±90°
HGR = Right-hand hinged lever 180°
HGL = Left-hand hinged lever 180°

D = 1 NO/1 NC
E = 2 NC

Family: **SI-LS**

Body Style: **31**

Actuator Type: **RT**

Contact Configuration: **D**

RT = Rotary shaft

D = 1 NO/1 NC
E = 2 NC

Enabling Devices

A two-hand control safeguarding system will prevent the operator from approaching the machine while a hazard is present. Duo-Touch Run Bar provides an all-in-one solution.

Handheld grip-styled switches are used for manual control of machine functions, including visual observations, minor adjustments, calibration and more.

Two-Hand Control

STB Self-Checking Touch Buttons				
Model	Connection	Touch Surface Material	Output	Power Supply
STBVP6	2 m cable	Polyetherimide (PEI)	Solid-state 2 Complementary PNP (1 ON, 1 OFF)	10-30V dc
STBVP6Q5	4-pin M12 QD			
STBVR81	2 m cable	Polyetherimide (PEI)	E/M Relay 2 Complementary SPST (1 NC, 1 NO)	20-30V ac/dc
STBVR81Q6	5-pin M12 QD			

STB buttons include yellow field cover to prevent unintended switching. To comply to safety standards, STB buttons must be used with appropriate Two-Hand control modules, SC26, XS26 or SC10 Safety Controller or comparable Type IIIC Two-Hand system.

DUO-TOUCH Two-Hand Control Kits with STB Touch Buttons

Components for Wire Rope Assembly

Who is Banner?

Banner Engineering manufactures industrial automation products that include sensors, LED lights and indicators, machine safety components, and industrial wireless devices. These products help produce the cars we drive, the food we eat, the medicine we take, and many of the things we touch every day. Headquartered in Minneapolis since 1966, Banner is an industry leader with more than 10,000 active products, operations on six continents, and over 5,500 employees, factory and field representatives, and application engineers. Every 3.5 seconds a Banner product is installed somewhere in the world.

Manufacturing Specialists

With over 30,000 products, Banner is a leading source for your manufacturing needs. We offer award-winning sensors, wireless solutions, vision sensors and lighting, machine safety, indicator lights, and LED lighting.

Application Solution Experts

Our field sales engineers are the most highly trained and experienced professionals in the industry. They can rapidly analyze an application to help you find the best solution.

Global Presence

Banner offers worldwide sales and support through a network of more than 3,000 professionals ready to help you no matter where you are located.

Unique Solutions

Banner's growing product line includes thousands of standard products. However, if you have an application requiring a unique solution or direct integration of a Banner product, contact one of Banner's Application Engineers to learn about our rapid customization and ability to deliver special product variations. Talk with an application engineer. Get product specs. Order now.
